We offer expert level service. With monthly maintenance calls to ensure your laundry needs are being met. Our goal is to help your laundry run efficiently and cost effectively. We strive to ensure the best results for your linens.

Kitchen Care

Automatic Dish Low Temperature / High Temperature

The SparClean Warewash line of products gives you the options you need to keep all of your glasses, dishes, pots, pans, and utensils in SparClean brilliance. These products were formulated with the latest technology, removing some of the less sustainable raw materials and choosing instead options that achieve performance without the traditional negative impact.

3-SINK SYSTEM

SparClean® Super Suds Dish Detergent

1 Wash

- Fill sink with Super Suds Dish Detergent
- Wash dishes with Super Suds Dish Detergent
- Use a brush to clean hard-to-reach areas
- Rinse dishes with clean water

2 Rinse

- Rinse dishes with clean water
- Remove items to clean racks

3 Sanitize

- Fill sink with Sani-T-10 Plus Sanitizer
- Sanitize dishes with Sani-T-10 Plus Sanitizer
- Check to be sure Sani-T-10 Plus is between 100 - 400 ppm
- Check Sani-T-10 Plus test strip
- Sanitize the equipment for at least 1 minute, then air dry

Sani-T-10® Plus Sanitizer

TEST STRIP INSTRUCTIONS

- Remove one test strip
- Immerse the test strip in the solution for 10 seconds
- Remove the test strip from the solution and compare to graph on container
- Use the color chart to determine the concentration of the solution
- Adjust the concentration of the solution as needed

EMERGENCY SANITIZER MIXING

Fill sink #3 with room temperature water to "Fill Line".

Add 1/4 ounce of Sani-T-10 Plus per gallon of water.

Check to make sure that sink #3 water is 150 - 400 ppm with test strip.
